Regulatory Tracking Summary

24 September 2010

This report summarizes regulatory items reviewed by the NASA RRAC PC. Items that appeared to have limited interest to the NASA community, or are provided for information only, are shown in light gray text. Notes and comments by the RRAC PC are shown in bold, blue text under "Description." Related documents and citations, such as "71 FR 51967," are linked to the appropriate document for quick access. Suggested follow-up actions are noted with significant items; users are advised that other follow-up actions may be appropriate for their program or facility. Previous issues of this regulatory summary are archived on the RRAC PC website at <http://www.nasa.gov/offices/rrac/home/>. Comments, questions, suggestions, and requests for further information should be directed to the RRAC PC Manager, Sharon Scroggins at 256-544-7932 (sharon.scroggins@nasa.gov).

1.2 Other News and Developments

1.2.1 ECHA RAC Proposes Substance as a Carcinogen

On 3 September 2010, the Committee for Risk Assessment (RAC) of the European Chemicals Agency (ECHA) unanimously agreed to recommend classifying tris[2-chloro-1-(chloromethyl)ethyl] phosphate (TDCP) as a carcinogen across Europe. TDCP, which is most commonly used as a flame retardant, has no current harmonized classification at the European Union level.

The RAC is responsible for providing scientific opinions regarding classification, labeling, and risks of chemicals to ECHA. The final decision for classification and labeling of chemicals is taken by the European Commission. The official [opinion](#) to classify TDCP as a carcinogen and more information about [RAC](#) can be found on the ECHA [website](#).

1.2.2 White House Releases Federal Agency Strategic Performance Plans

On 9 September 2010, the White House released the Federal Agency Strategic Sustainability Performance Plans from every federal agency. Federal agencies were required to develop Federal Agency Strategic Sustainability Performance Plans as part of their implementation of Executive Order 13514, Federal Leadership in Environmental, Energy and Economic Performance. The Strategic Sustainability plans contain prioritized actions to meet energy, water, and waste reduction targets, based on a positive return on investment. This is the first time agencies have developed and submitted Sustainability Plans. The plans may be viewed on the Council on Environmental Quality [website](#).

1.2.3 Installation of Cool Roofs on DOE and Federal Government Buildings

President Obama issued [Executive Order 13514](#) to reduce GHG emissions by 28 percent by 2020. The Secretary of Energy has issued a [memo](#) stating that the DOE and federal government should be leading the nation in more sustainable building practices. The [DOE](#) has identified the installation of cool roofs as a cost-effective means of improving building efficiency, reducing

cooling costs, and offsetting carbon emissions. The Secretary of Energy has directed all DOE offices to install cool roofs when cost effective for existing buildings or during replacement or new construction projects. [Guidance](#) has been provided to assist agencies in identifying cool roof options for implementation at their facilities.

1.3 Regulatory Communication Working Group Updates

Regulatory Communication Working Group calls in 2010 will be held on the following Wednesdays at 12 p.m. CT:

- 13 October
- 15 December
- 24 November

2.0 State Regulatory Reviews

The following sections provide details about the regulatory actions reviewed for selected states in which NASA facilities and related operations are located.
